

WORKSHOP ETIQUETTE

In the interests of a harmonious workshop please RESPECT others members by :

- Tidying your workspace & replacing tools after use
- Whenever possible, leave benches clear after a work session and put unfinished projects in the Project Rack until you revisit your project.
- Take home and re-cycling any waste generated during your project.
- If you have used significant quantities of consumables during your project such as screws, nails, drills, sandpaper, paint etc. please replace with similar items or make an appropriate donation to the Shed.
- Breakages of equipment attributed to "normal wear & tear" will be rectified by Men's Shed without cost. Where breakages of tooling can be attributed to abuse or incorrect use, the member responsible for the damage is expected to pay for the repair.
- In the interests of keeping a tidy and spillage-free workshop a kitchen area has been provided for socialising.

PLEASE DO NOT TAKE DRINKS INTO THE WORKSHOP AREA.
